THE MEDICAID EXPANSION: IMPACT ON INDIVIDUALS

VIRGINIA

STATE FACT

Expanding Medicaid could give health coverage to around 15 million low-income Americans. Unfortunately, nearly one-fourth of those eligible live in states where legislators have said they will not extend Medicaid benefits.

This means that close to **3.9 MILLION INDIVIDUALS** would not qualify for Medicaid benefits and would have to **PAY OUT-OF-POCKET FOR HEALTH CARE.**

342,000 individuals are eligible for Medicaid benefits if **VIRGINIA** chooses to participate in expansion.
